Independent Software Studio

Your business grows. Manual work shouldn’t grow with it.

We are an independent software developer. We build CRM systems, web platforms, AI assistants and automations — tailored to your business, not the other way around.

WHERE TIME GETS LOST

01 Data is scattered everywhere

Clients in Excel, conversations in WhatsApp, tasks in someone’s head. Information gets lost between tools.

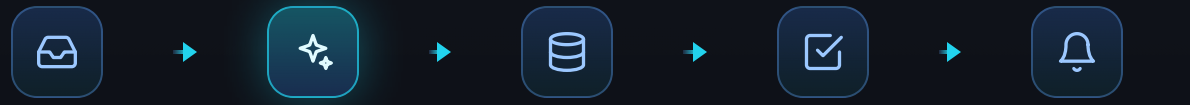

02 The same work, every day

Answering identical questions, copying data, preparing documents and reports by hand.

03 Slow replies, missed leads

When a request waits hours for an answer, the client may simply choose a competitor.

HOW IT CAN WORK INSTEAD

New request — website, WhatsApp, Telegram

AI assistant — replies and collects details

Saved to CRM — client card is created

Task for the team — with owner and deadline

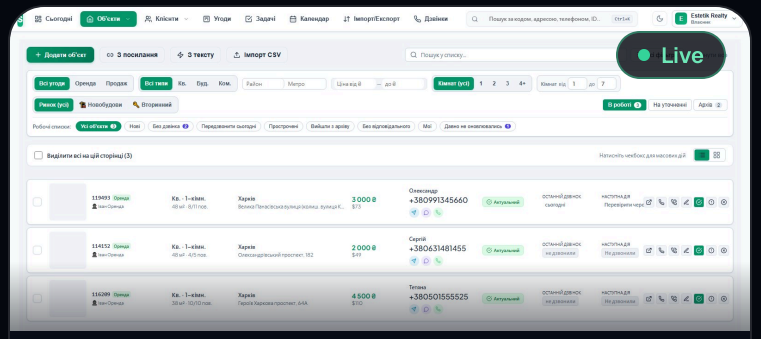

Auto reminder — nothing is forgotten

WHY CUSTOM INSTEAD OF OFF-THE-SHELF?

OFF-THE-SHELF SOFTWARE	CUSTOM SOLUTION
✕ You pay for features you never use	✓ Only the features your business needs
✕ Your team adapts to the software	✓ The software follows your process
✕ Hard to connect with other tools	✓ Integrated with the services you already use

Real products — designed, built and launched by us.

Each one started from a practical business problem. The same experience goes into every custom project.

Rieltix

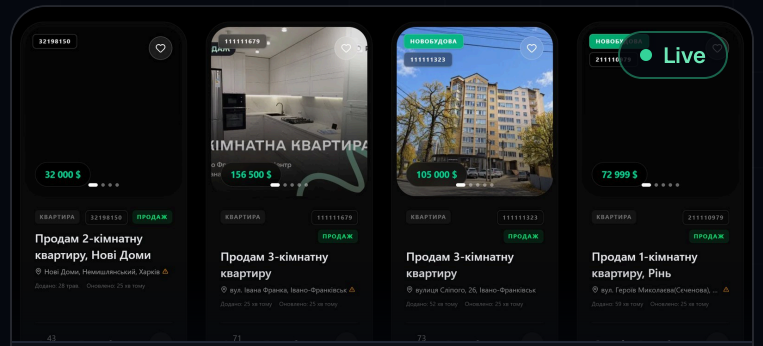

rieltix.com ↗

CRM for real estate agencies

- ✓ Property and client database
- ✓ Team tasks and calendar
- ✓ Agency website with catalog and map
- ✓ Telegram integration, workflow automation

BUSINESS VALUE

Agents see the next step for every client — nothing gets lost between chats and spreadsheets.

Mapest

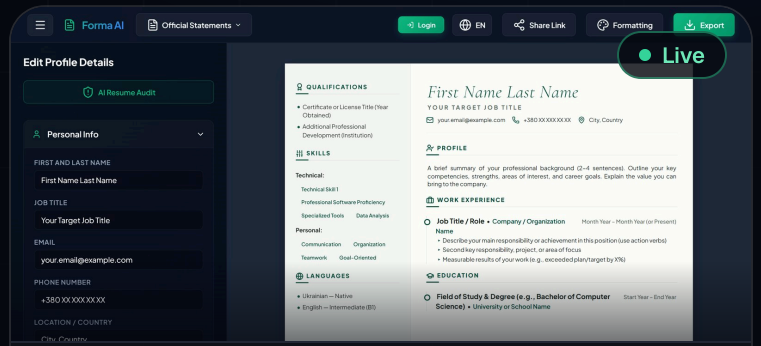

mapest.app ↗

Property search & listings platform

- ✓ Listing aggregation and de-duplication
- ✓ Interactive map with area selection
- ✓ Structured catalog with detailed filters
- ✓ Automatic data updates, Telegram alerts

BUSINESS VALUE

Large volumes of scattered data are collected, organized and kept up to date automatically.

Forma

forma.ink ↗

Smart document builder with AI

- ✓ Templates for letters, agreements, statements
- ✓ Live editor with instant preview
- ✓ AI help to improve and translate text
- ✓ Digital signature, export to PDF and Word

BUSINESS VALUE

Less time on routine paperwork — and documents that look consistent every time.

What we can build for your business

We start from the result you need — and only then choose the technology.

CRM & Business Management

All clients, deals and tasks in one place. You can see what is happening in your business at any moment.

FOR EXAMPLE Sales pipeline, team tasks, owner dashboard

AI Assistants & Chatbots

Answer common questions 24/7, collect client details and pass ready requests to your team.

FOR EXAMPLE WhatsApp / Telegram bots, website chat.
Voice AI assistant — in development

Business Process Automation

Repetitive tasks run on their own: reminders, notifications, reports and data transfer.

FOR EXAMPLE Automatic follow-ups, daily reports, document generation

Websites & Web Applications

A fast, modern website that sends client requests straight into your system.

FOR EXAMPLE Company website, product catalog, client portal

Custom Software Development

Software built for your exact process when ready-made tools don't fit.

FOR EXAMPLE Internal systems, booking, inventory, price calculators

API & System Integrations

Your tools talk to each other — no more copying data by hand between apps.

FOR EXAMPLE CRM + messengers + payments + spreadsheets

The right technology, with a personal approach.

You work directly with the developer who builds your product — no layers of managers in between.

Built around you

No templates forced on your team. We study your process and build exactly what it needs.

Flexible and direct

You talk to the developer directly. Decisions are fast, changes are easy to discuss.

Proven by real products

Rieltix, Mapest and Forma are online — you can see the quality before we start.

Sensible budget

Only the features you need, without big-agency overhead. Pay per project or monthly.

Gradual implementation

Start with one important process, see the result, then expand step by step.

Support and growth

After launch we maintain and improve the product on agreed terms.

STEP-BY-STEP ROLLOUT

- PHASE 1 **Core**
  One key process is automated
- PHASE 2 **Integrations**
  Connect the tools you already use
- PHASE 3 **AI & scale**
  Assistants, analytics, new features

How we work

1 **Discuss the task**
A short conversation about your business and goals.

2 **Analyze needs**
We map the process and decide what to automate first.

3 **Solution & cost**
A clear proposal: scope, timeline and price.

4 **Build & test**
Regular demos, so you always see the progress.

5 **Launch & grow**
Go live, onboard the team, keep improving.

WAYS TO COOPERATE

Custom project
A solution built from scratch for your specific task.

Monthly subscription
Selected services and products are available on a monthly plan.

Have an idea or a business problem you want to automate? Let's discuss the solution.

Write to us — we'll reply and arrange a convenient time for a consultation.
